Empirical descriptor response: Hb vs product TOF
Historical single-species energies; strict CatMAP TOF points; empirical fits only
linear fit (LOOCV RMSE=5.29)
quadratic fit (LOOCV RMSE=4.79)
segmented fit (LOOCV RMSE=4.68)
linear boundary maximum
quadratic internal peak
segmented boundary maximum
quad peak
-4.114 eV, logTOF=-0.73
